EXPERIENCE

Charles Schwab

Lone Tree, CO

Software Development Engineer I

June 2018 – March 2019

Software Development Engineer III

March 2019 – Present

- Co-led team of seven building .Net Core microservices to support capabilities like billing, offer management, and reporting in automated investing products.
- Delivered technology for innovative subscription pricing structure, which attained \$1bn in net new assets.
- Mentored new team members, performed code reviews, and trained in the process around releases, production support, and Agile SDLC.
- Achieved vulnerability ratings above 90% on static code scans for 5 applications.
- Demonstrated technical changes to executive and non-technical audiences of 50+ people.
- Identified and attracted new talent, represented Schwab at three or more campus recruiting events per year, and conducted interviews for the intern program.

Vail Resorts

Broomfield, CO

Web Development Intern

June 2017 – January 2018

- Collaborated with a retail web technology team on ski resort web applications for 10+ resorts.
- Built an internal tool with two intern teammates for graphic designers and front end developers to manage SCSS class definitions in a GUI.
- Shortened the time to style a new resort web application from three weeks to three hours.

MindDance

Denver, CO

Outreach Manager and Site Leader

November 2015 – June 2018

- Trained instructors, developed curriculum, and led classes for an elementary after-school program in animation and video game creation at 15 sites over three years.
- Oversaw outbound communication to 300+ families of students in the Denver area from teaching staff.
- Published a monthly newsletter showcasing student work.

EDUCATION

University of Denver

Denver, CO

Bachelor of Science in Computer Science

September 2014 – June 2018

- Performed highly in systems and software theory coursework such as programming languages and operating systems.
- Leveraged degree electives to specialize in interests like software engineering, web development, distributed databases, and parallel/distributed computing.
- Led front-end team for full-stack web development class, building a tool to visualize randomly-generated abstract syntax tree representations of practice algebra problems.

ADDITIONAL

Technical Skills: OOP in Java and C#, cloud architectures, SQL/NoSQL databases, web application security, Angular, Git, automated unit and integration testing, Apache Spark, Python scripting

Languages: Fluency in English and Spanish, spoken and written.
